The Government of U.P. has taken a bold decision to introduce reforms in the power sector. Unfortunately, the workers of UPSEB had decided to go on strike. The action of the workers had resulted in a lot of discomfort to the pubic and in the emergency situation a strong need was felt to keep the public informed of the pros & cons of the ongoing long drawn out strike so vitally affecting them. It was also necessary to inform the public of the reform process which had been initiated and to counteract the disinformation that was being spread in certain quarters. It was, therefore, considered desirable and essential to launch an awareness campaign through the Media so as to educate the public at large about the issues at stake. The campaign highlighted the reason for which the reforms had been introduced and the likely impact of these reforms. The campaign was appreciated and created the right climate for reforms.
